**NOTICE OF ALLOWABILITY**

***Allowable Subject Matter***

Claims 6, 7, and 9 are allowed.

The following is an examiner's statement of reasons for allowance: The specific limitations of "...wherein said container is shaped like a rule and has marks for measuring a distance...wherein said container has one side fixedly mounted with a folding sheet member...wherein said container further comprises a plurality of ribs located inside said flat liquid chamber and forming with said flat liquid chamber a labyrinth, and floating elements floating in said bubble solution inside said flat liquid chamber..." are not anticipated or made obvious over the prior art of record in the examiner's opinion.

For example, U.S. Patent No. 6,443,791 B1 to Portwine teaches a container (18) having two flat cover plates (53) connected together forming a flat liquid chamber (70) between them to hold a bubble solution therein (see Abstract), an opening (60), and a bubble-blowing bar (24) removably inserted into the flat liquid chamber through the opening for blowing the bubble solution into bubbles (see fig. 3, and Abstract). However, the prior art of record fails to teach the limitations regarding the container being shaped like a rule or a labyrinth, and the container having one side mounted with a folding sheet member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
